

## FULFILLMENT

# New to EDI?

We're here to help

Become 100% EDI compliant with the SPS Commerce Fulfillment (EDI) solution. Our expert team will get you up-and-running fast, so you can be ready to take orders from any retailer, grocer or distributor.

## What is EDI?

Electronic data interchange (EDI) allows companies to exchange digital information in a standard format.

Retailers require their vendors to become EDI capable in order to automate processes such as ordering, invoicing and shipping that were previously done with paper or fax.

## The industry's most trusted EDI solution

More than 80,000 customers around the world use the SPS Fulfillment solution to take the complexity out of connecting with their trading partners.

### Meet all your trading partners' requirements

Achieve EDI compliance easily with pre-built, battle-tested connections to thousands of trading partners. Quickly comply with any EDI or shipping label requirement for any sales channel and any order fulfillment model.

### Our full-service team does the heavy lifting

Don't know much about EDI? No problem. Our expert team handles all the details of implementing and maintaining your EDI solution on your behalf—including EDI testing, spec changes and map updates.

### Greater efficiency, fewer keystrokes

Fulfillment includes built-in automation features that source in data based on your trading partners' requirements, which means less data entry and fewer errors.

### Get help whenever you need it

Access our expert support team at no cost any time you need help, via phone, email, chat or directly within the Fulfillment product.
