

# sage Inventory Advisor

Reduce excess inventory  
Release working capital  
Minimize stock-outs

Sage Inventory Advisor is an affordable cloud application that helps companies reduce excess inventory and free up working capital while minimizing stock-outs and increasing revenue.

It is designed to integrate with Sage ERPs to provide visibility of inventory levels and investment, produce quality forecasts and optimal replenishment recommendations.

Visual dashboards display overall inventory performance and provide early warning of items needing attention.

Sage Inventory Advisor is easy to use, quick to adopt and can be accessed anytime, anywhere via web browser or mobile device.

## Benefits

- **Reduce inventory by 10%-25%**, reduce working capital and improve cash flow.
- **Improve fill rates by 2%-10%**, minimize stock-outs and increase sales.
- **Significantly reduce the time spent** on planning, forecasting and ordering.
- **Better inventory visibility**, including early warning of items needing attention.
- The right inventory in the right place at the right time, **helping you to grow your business.**

**"In the first six months, we saw a 14% increase in inventory availability combined with a 38% increase in sales. Sage Inventory Advisor is a highly valued solution that gives our business a competitive edge."**

Steven Cumper, Director and Co-Founder – Medshop Australia (Medical Supplies)

Track performance and identify problem items through interactive dashboards with drill down features

Utilize the latest forecast technology to generate item forecasts while facilitating manual overrides

## Fast to Implement and Cost Effective

Sage Inventory Advisor can be implemented in days and is accessible anytime, anywhere.

- A cloud application, with no additional hardware or software to purchase
- No licence fees, no yearly maintenance fees and no cost to upgrade
- A once-off cost to implement and monthly subscription pricing with no minimum term

## Built to work with your Sage ERP

Sage Inventory Advisor has been designed to integrate with your Sage ERP solution, to extract added value from the numbers already being generated across your organization.

- Automatically connects to inventory data for analysis, forecasting and replenishment
- Complements existing Inventory Management and Inventory Control modules
- Provides dynamic forecasting and planning capabilities

## Features

### Dashboards provide visibility

Sage Inventory Advisor delivers an up-to-date view of your inventory, so you know what's going on – and what's going wrong.

Dashboards track KPIs, giving you an unprecedented visibility into the health of your inventory and the purity of your data.

### Classification provides focus

Sage Inventory Advisor gives you the tools to focus your energy where it will have the most impact, so you can continue growing your business.

Classify your stocked items by both value and velocity to learn new insights about your inventory with the app's Classification Matrix.

Identify your fast moving high value items, your slow moving expensive items, or your fast moving inexpensive items.

### Save time creating and reviewing forecasts

Sage Inventory Advisor generates accurate, data-based forecasts that save you the time, hassle, and errors of manual forecasting.

Best-fit forecasting creates high quality forecasts for the bulk of your items, while the dashboard highlights the small percentage of items that need manual intervention.

Sage Inventory Advisor gives you the tools to create the best possible forecast, resulting in optimal purchasing and planning – helping you to grow your business.

### Create orders at the click of a button

Sage Inventory Advisor automatically collects, collates, and processes your inventory data, presenting you with ideal order recommendations with one click.

Easily resolve how to fill containers by volume or weight, or to meet supplier imposed minimum unit quantities or order values.

Order ahead when buyers are due to go on leave or to cater for supplier shutdowns such as Chinese New Year.

Review, download, and import orders, saving you time and improving your ordering process.

### Easy-to-use graphical user interface

The easy-to-use interface for desktops, tablets, and mobile devices has been designed to be as intuitive as possible.

Standard web behavior enables intuitive navigation and improved ease-of-use.

Built-in support tips provide more detailed explanations.

Rich, dynamic graphics enhance understanding.

Filter listings and download them to a CSV file, or drill through to individual item details.
