

Intelligent eCommerce for your business

commercebuild powers an online store to sell to your customers 24/7 providing an “Amazon like” buying experience. We maintain the connection and software so you can focus on growing your business and keeping customers happy.

Sage is an integral part of your business—and what you’ve built your business upon. With digital transformation taking hold, you’re now looking at eCommerce to drive incremental revenue and improve operating efficiencies. To maximize your investment in Sage, it makes sense to use an eCommerce solution that’s already fully integrated. As the only Sage certified eCommerce solution, commercebuild empowers you to seamlessly extend your Sage solution to the digital world with secure and real-time connectivity. Right from the start. No disconnected databases. No manual re-entry of orders. No costly integration projects that inevitably go over budget and over time. Now that’s Intelligent eCommerce for your business. commercebuild provides you with Intelligent eCommerce in three ways:

Insightful

Delivers real-time insight and analytics, providing you with comprehensive visibility across your entire eCommerce operation

Intuitive

Built-in responsive design templates allow you to extend your business and brand online, all managed through the easy-to-use eCommerce Console.

Integrated

commercebuild is a seamless extension of your sage solution allowing you to streamline your online business process for fast ROI

If it isn't Integrated eCommerce, it isn't Intelligent eCommerce

Unlike eCommerce solutions that require heavy customization and complex integration to support your business operations, commercebuild is purpose built for Sage:

1. Fully integrates with your Sage solution with secure, real-time connectivity
2. Cost-effective to maintain, delivering you a fast ROI on your investment
3. Easy to use and simple to manage, allowing your staff to focus on higher value initiatives
4. Responsive site design that reinforces your brand and scales to any device
5. No separate database means no worries about tedious and error prone data re-entry
6. An eCommerce solution that scales with your business without future customization

Why commercebuild?

commercebuild delivers a robust and scalable eCommerce solution to help you drive incremental revenue and improve operational efficiencies, making your business even more competitive.

- Mimics your pre-defined business logic in Sage
- Real-time orders and payments integration
- Always accurate inventory management
- Cost effective to maintain for fast ROI
- Out-of-the-box, real-time, two-way integration
- Anywhere, anytime access for remote teams
- Streamline your business processes
- Deep reporting capabilities
- Site creation all done in hours
- Built-in responsive web design themes
- Easy-to-use eCommerce console
- Scales as your business grows
- Reallocated staff to focus on building the business and servicing clients

“Our commercebuild solution provides just about the best ROI of any application we have implemented.”

Mike Grilli, Batteries Expert
